# CME INFORMATION

## EDUCATIONAL OBJECTIVES

After participating in this educational activity, attendees will be able to:

1. Identify important research and clinical advancements relating to topics within academic surgery, including oncology, trauma, critical care, pediatrics, vascular, cardiothoracic, gastroenterology, transplant, education, emerging technologies, global surgery, clinical trials, outcomes, and health services research.
2. Develop an understanding of current issues in the advancement of the art and science of surgery.
3. Improve treatment strategies for surgical patients.
4. Discuss the latest basic science, translational, and health services research and the expected impact of these breakthroughs in future patient care.
5. Review the newest technologies that facilitate improved outcomes in surgical patients.

## CME ACCREDITATION

This activity was planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education through the joint providership of PESI, Inc. and the Academic Surgical Congress (ASC). PESI, Inc. is accredited by the ACCME to provide continuing medical education for physicians.

The PESI, Inc. designates this live activity for a maximum of **25.5 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

**International CME:** International Physicians are formally eligible for *AMA PRA Category 1 Credit™*.

**Physician Assistants:** AAPA accepts Category 1 credit from AOACCME, Prescribed credit from AAFP, and *AMA PRA Category 1 Credit™* for the PRA from organizations accredited by ACCME.

## ACADEMIC SURGICAL CONGRESS POLICY ON CONFLICT OF INTEREST

### A. Identifying Conflicts of Interest

The ASC Conflict of Interest Committee has implemented the following process towards identifying potential conflicts of interest.

1. Members of both AAS and SUS Committees involved in the planning of the Academic Surgical Congress, including the Core Group, must provide a financial disclosure. These disclosures are sent to the committee in advance of each committee meeting/conference calls. Attendees are reminded about the disclosure policy at each committee meeting, and any committee member with a conflict is asked to recuse him or herself from the discussion of any relevant CME activities.
2. Invited faculty and moderators for the Academic Surgical Congress must provide their financial disclosures upon invitation to serve as faculty or moderator. This information is forwarded to the Conflict of Interest Committee, who then determines whether or not a potential conflict exists.
3. For abstract submissions for the scientific session, all content authors must provide disclosures upon abstract submission. Abstracts are peer reviewed in a blinded fashion by multiple reviewers and are selected for presentation based on scientific merit. All disclosures which indicate a potential conflict are provided to the Conflict of Interest Committee for review. No content author may be an employee of a commercial interest.
4. All speakers at the Academic Surgical Congress must display a list of financial disclosures on the first slide of their presentation and disclosures are printed in the final program materials.

### B. Managing Potential Conflicts of Interest

The ASC Conflict of Interest Committee has implemented several mechanisms to manage conflicts of interest prior to an educational activity.

1. Recusal, such as the committee member recusing him or herself from discussion of CME activities, and/or oversight by the Committee Chair.
2. The ASC Conflict of Interest Committee reviews all invited faculty and abstract author disclosures, and their respective proposed course outlines/faculty lists and abstracts. The disclosure form requires faculty/authors to provide management suggestions if there is a relationship with a commercial entity. If there is a potential conflict cited, this information is forwarded to the ASC Conflict of Interest Committee, who is responsible for determining whether or not a conflict exists and if so, how to manage this conflict.
3. If a conflict is determined, then a notice is sent via email to the faculty member/author from the ASC Program Chairs, requiring them to adhere to the management technique. Management techniques may include providing an explanation of the potential conflict, changes to the presentation, recusing him or herself from the presentation, and/or submitting the presentation in advance of the ASC for peer review

## CME INFORMATION

4. Session Moderators will be notified which faculty were reviewed for potential conflict and are asked to observe the presentations and make note of commercial bias. If any is perceived, this is immediately reported to the ASC staff and the Moderator should also take steps to clarify this during the actual session by asking the faculty member/presenter to provide an explanation.
5. All ASC attendees are asked to make note of perceived commercial bias in the immediate post activity evaluations. The ASC Conflict of Interest Committee will investigate substantive concerns.
6. Any session moderators with a potential conflict must:
  - a. Confer with their Session Co-Moderator regarding their disclosures prior to the session.

If their disclosed relationship may have a potential conflict of interest with the content of any presentation in their session, both moderators should address this potential conflict. If there is a conflict, or even the perception of a conflict, then the moderator without the relationship will moderate the discussion of that particular presentation.

## CME CREDIT CLAIM INSTRUCTIONS

**Please read the instructions below for obtaining your CME Certificate and Certificate of Attendance.**

ASC meeting evaluations are electronic via the online evaluation system. If you are seeking CME credit or a Certificate of Attendance, you may print your certificate upon completion and submission of the online evaluation form.

Please go to the online meeting website for the link to the evaluation system:

<http://www.academicsurgicalcongress.org/> or access the evaluation system site directly at: <http://data.express-evaluations.com/eval/37232/web/main.php>

You will be prompted to enter login information to access the evaluation. The login information is your **registrant email address**. The password is **ASC** and is not case sensitive. You should also have received an email including this information. If you require the email used for your registration, contact the ASC Registrar at [registrations@academicsurgicalcongress.org](mailto:registrations@academicsurgicalcongress.org) or at 310-986-6444, ext 128. The evaluation includes the following sections: Demographics, Session Evaluation, and the Overall Evaluation.

Be sure to complete the online evaluation by **March 31, 2020**. You will receive your CME Certificate or Certificate of Attendance immediately after submitting your evaluation. Your certificate will be available for printing for 1 year after the meeting.

Blue Chair of General Surgery, The University of Alabama at Birmingham  Participants in this session will learn the importance of identifying purpose in your life.	Citron Ballroom
11:40 AM - 1:00 PM	<b>Hot Topic Lunch Session: “Artificial Intelligence, Machine Learning &amp; Surgical Science: Reality vs. Hype”</b> Session Chairs: Haytham Kaafarani, MD, MPH and Georgios Tsoulfas, MD  AI is ubiquitous in our lives. From Siri, Alexa and “ok Google” and face-recognition technology to self-driving cars, we all interact with AI on a daily basis. There is rarely a surgical conference these days that does not feature a study using AI techniques. The great increase in the use of AI and machine learning for biomedical applications is often accompanied by claims and impacts that are not realistic given the limitations of the technology. There is a need to increase the general level of understanding of these methods for surgical researchers so that the same degree of critical analysis they apply to other research topics can also be used to evaluate work in this area. This session will aim to present the opportunity of using AI in surgery but will also discuss its pitfalls and shortcomings.  Introduction – Haytham Kaafarani, MD, MPH AI & Risk Modeling/Prediction: A New Era of Decision-Making in Surgery? – Majed El Hechi, MD AI and Image Recognition: A Video is Worth a Thousand Words – Thomas Ward, MD AI: “You keep using that word. I don’t think it means what you think it means.” – Gary An, MD Question and Answer  At the conclusion of this session, participants will be able to: <ul style="list-style-type: none"> <li>• Recognize the strengths and limitations of machine learning and artificial intelligence.</li> <li>• Distinguish between appropriate and inappropriate claims from machine learning and artificial intelligence projects.</li> <li>• Critically evaluate a machine learning or artificial intelligence projects.</li> </ul>	Pavilion
11:40 AM - 1:00 PM	<b>Hot Topic Lunch Session: “The ACA at 10 Years: Evaluating the Evidence and Navigating an Uncertain Future”</b> SESSION CHAIRS And MODERATORS: John Scott, MD, MPH and Thomas Tsai, MD, MPH  Passage of the Patient Protection and Affordable Care Act (ACA) in 2010 has resulted in the most sweeping changes to US healthcare since the establishment of Medicare. Academic medical centers have a unique role in the delivery of healthcare in the US as they serve as referral centers for highly complex patients, function as safety-net facilities that care for uninsured and under-insured patients, and train the next generation of surgeons. As such, academic surgeons, surgical departments, and our patients have been particularly affected by the ACA’s reforms that have focused on increasing insurance coverage, improving quality of care, and reducing costs. The actual impact of the ACA on surgical care is variable, and ongoing  policy proposals ensure that more changes are on the way. Surgeons practicing today must be equipped with the knowledge and the tools to ensure high-quality care delivery, world-class resident education, policy-relevant research, and financial solvency.	Sabal D

Impact of ACA's Medicaid Expansion on Surgical Access, Cost, and Quality – John Scott, MD, MPH  
 Impact of the ACA on Disparities in Surgery – Regan Bergmark, MD  
 Accountable Care Organizations and Surgical Value – Hari Nathan, MD, PhD  
 Impact of ACA-Related Payment Reform on Surgical Care in the US – Thomas Tsai, MD, MPH  
 Applied Policy-Analysis for Surgeons: Hospital Readmissions Reduction Program – Andrew Ibrahim, MD  
 Question and Answer

At the conclusion of this session, participants will be able to:

- Identify gaps in access to surgical care in the US and anticipate how health reform policies may limit or expand access.
- Compare the ways in which health policy interventions will impact the cost, quality, and value of surgical care in the US.
- Evaluate ongoing health reform legislation, understand anticipated impact, and also anticipate unintended consequences.

11:40 AM – 1:00 PM

**Hot Topic Lunch Session: “Moving the Needle on Surgical Quality: A Focus on Vulnerable Populations”**

Citron Ballroom

Session Chairs: Thomas Robinson, MD and Sandhya Lagoo-Deenadayalan, MD, PhD

Vulnerable patients from both physiologic and social standpoints are particularly susceptible to poor surgical outcomes. This session will address surgical assessment, decision-making, and outcome measurement in this population with an emphasis on developing high quality surgical care processes for frail older adults.

Patient-Reported Surgical Outcomes in Vulnerable Populations – Lola Fayanju, MD  
 Recognition of the Vulnerable Older Adult: Frailty and Beyond – Meixi Ma, MD  
 High-Stakes Surgical Decisions in Frail Older Adults: “Best Case/Worse Case” – Gretchen Schwarze, MD  
 Accounting for Patient-Centered Care as a Quality Measurement – Rachel Greenup, MD  
 Measuring Quality Surgical Care to Answer the Question – National and Local Implementation – Lindsey Zhang, MD  
 Engaging Stakeholders to Develop Surgical Care Models for Older Adults – Sandhya Lagoo-Deenadayalan, MD, PhD

At the conclusion of this session, participants will be able to:

- Understand the importance of including patient-reported surgical outcomes in the surgical care of vulnerable population.
- Develop care process to recognize and optimally manage frail older adults.
- Learn how to develop quality care programs on both a local and national level to systematically improve surgical care for vulnerable populations.

1:00 PM - 2:30 PM

**SUS Presidential Session: “Academic Surgery with a Purpose”**

Citron Ballroom

In this session we will hear from 4 academic surgeons who have clear and focused efforts on their purpose. Through their purpose driven work they are able to stay healthy and joy-filled as they work in their academic positions. This session will be appropriate for learners at all levels of training.

Introduction – Gregory Kennedy, MD, PhD, SUS President  
 Finding Purpose in Data – Gretchen Schwarze, MD  
 Finding Purpose and Fulfillment in an Academic Clinical Practice – Adam Beck, MD  
 Purpose at the Bench – Clifford Cho, MD  
 Finding Joy and Purpose in Educating – Britney Corey, MD

At the conclusion of this session, participants will be able to:

- Identify the importance of purpose in our academic life.
- Relate the presence of purpose and decreased risk of burnout.
- Assess the importance of purpose in pursuing an academic surgical career.

2:30 PM - 3:00 PM	<p><b>SUS Joel J. Adopting Innovation: Navigating Transition from Bench to Bedside – Ethical Considerations of a Uterus Transplant Program – Anji Wall, MD, PhD

At the conclusion of this session, participants will be able to:

- Prepare academic surgeons with effective strategies to combat common/predictable challenges and master predictable transitions throughout their career.
- Explore 'bail-out' strategies that early career faculty may employ to salvage early academic missteps.
- Address the risks and ethical considerations necessary in the adoption of innovation and the transition of translational research to patient care (bench to bedside).

**Committee and Elsevier Lunch Session: “How to Write a Manuscript That Journals Can’t Say No To: Insights From the Editors of Surgery and Journal of Surgical Research”**

Citron Ballroom

SESSION CHAIRS: Scott LeMaire, MD and Luke Funk, MD, MPH

During this session, four journal editors will help academic surgeons at all levels—medical students, residents, fellows, and faculty members—become more successful in getting their scientific papers accepted for publication. Attendees will learn advanced approaches to writing compelling papers, effectively responding to reviewers, and making necessary revisions.

Introduction – Luke Funk, MD, MPH

What Happens to Your Manuscript After You Click the Submit Button – Scott LeMaire, MD

How to Make Reviewers Happy With Your Manuscript – Rebecca Sippel, MD

How to Frustrate Reviewers – Jussuf Kaifi, MD, PhD

How I Make a Decision About Whether to Ultimately Accept or Reject a Manuscript– Kevin Behrns, MD

Panel Discussion

At the conclusion of this session, participants will be able to:

- Describe the editorial process that occurs after a manuscript has been submitted to a scientific journal.
- Improve their success in getting their scientific papers accepted for publication by applying constructive tips and avoiding key pitfalls when writing and revising manuscripts.
- Apply advanced considerations when writing the introduction, methods, results, and discussion sections, and understand how these approaches will increase the chance of having a manuscript receiving a favorable review.
- Effectively address reviewers’ critiques and revise a manuscript to optimize the likelihood of having it accepted for publication.

**AAS Presidential Session: “Joining the “Dark Side!” An Inside Look at Surgeons’ Pathways to Administrative Leadership”**

Citron Ballroom

MODERATOR: Karl Bilimoria, MD, MS

Surgeons are increasingly taking on major responsibilities as hospital and health system administrative leaders. We’ve invited a distinguished group of surgeon health system administrators including CMOs, CQOs, COOs, CCOs, and presidents who did not follow the chief-to-chair pathway. They will describe their pathways to becoming health system administrative leaders and will counsel young academic surgeons on whether and how to take on these roles and what to be wary of when thinking about these types of opportunities.

Surgeons as Health System Leaders- A Real Life Perspective – Bruce Hall, MD, PhD

Surgeons as Health Systems Administrators: It’s Time for us to Engage! – Susan Moffat Bruce, MD, PhD, MBA

Surviving the Dark Side’s Approach to Leadership Development – David Miller, MD

A Transition to Health System Leadership: Planning and Serendipity – David Berger, MD, MHCM

At the conclusion of this session, participants will be able to:

- Describe some of the pathways to administrative health system leadership roles
- Describe some of the important factors to keep in mind when considering an administrative health system leadership role
- Describe examples of how to balance your clinical and research interests when you take on an administrative health system leadership role

**Committee Session: “Leadership Challenges – Responding Effectively to Under-Performance”**

Pavilion

Session Chairs: Val Nfonsam, MD, MS, Brenessa Lindeman, MD, MEHP & Kimberly Brown, MD

This session addresses scenarios in which a leader is required to respond to the poor performance of a team member, from clinical or outcomes problems to inter-personal/behavioral issues. Our panel of seasoned experts will provide specific responses to the scenarios and general principles to guide leaders in selecting the most effective response to these common challenges.

Framing the Problem – Kimberly Brown, MD  
 Presenting the Scenarios – Brenessa Lindeman, MD, MDHP  
 Chair’s Perspective – Rebecca Minter, MD  
 Program Director’s Perspective – Val Nfonsam, MD, MS  
 CMO’s Perspective – Robert Keenan, MD, MMM  
 Chief Legal Officer’s Perspective – Jeanette Schreiber, JD, MSW

- At the conclusion of this session, participants will be able to:
- Describe strategies to engage a low-performing surgeon in an effective intervention to improve outcomes.
  - Describe the HR, ACGME and legal policies that impact performance improvement and advancement decisions in trainees and practicing surgeons.
  - Create and effective strategy to address common performance problems encountered by leaders in academic surgery.

12:05 PM – 1:30 PM

**Committee Lunch Session: “How to Master the Digital Age: Personal, Program, Patients & Pitfalls”**

Citron Ballroom

Session Chairs: Mio Kitano, MD, MS and Ankush Gosain, MD, PhD

As academic surgeons, we are taught to diagnose surgical conditions and hone our technical skills, however none of our training prepares us for how to manage the interface of the ever-evolving digital age and our academic practice. If you are an academic surgeon or are in-training to become one, this session will show you how to leverage technology to enhance your personal portfolio and advance your research and clinical programs, and how to avoid common social media pitfalls.

Introduction – Mio Kitano, MD, MS  
 Personal: Developing Your Digital Academic Portfolio – Sundeep Keswani, MD  
 Program: Digital Tools to Support Your Research Program – Ankush Gosain, MD, PhD  
 Patients: Using Social Media to Grow Your Clinical Program – Heather Yeo, MD, MHS, MBA  
 Pitfalls: When Social Media Goes Awry – Lillian Erdahl, MD  
 Question and Answer

At the conclusion of this session, participants will be able to:

- Understand how to develop a toolkit to create and manage their academic digital portfolio.
- Identify digital advances that can advance their research and clinical programs.
- Appreciate the risks of social media usage gone awry and strategies for avoiding pitfalls.

12:05 PM – 1:30 PM

**Hot Topic Lunch Session: “Coach Them Up! Mental Skills Training for Surgeons”**

Pavilion

Session Chairs: Dimitrios Stefanidis, MD, PhD and Nicholas Anton, MS

The goal of this session is to provide an interactive forum to help surgical faculty and residents understand the effects of stress and other psychological barriers on surgeons' performance and wellbeing, discuss the potential benefits of applying mental skills and mindfulness-based skills with surgeons to mitigate stress and optimize performance, and practice mental skills (i.e., energy and attention management skills, and mindfulness-based techniques) for peak surgical performance. It is our goal that participants of this session will be able to learn or refine existing strategies to limit their performance deterioration under stressful conditions, and enhance their wellbeing and executive function.

Effects of Stress and Other Psychological Barriers on Surgical Performance – Dimitrios Stefanidis, MD, PhD

Neurocognitive and Physiological Mechanisms and Effects of Mental Skills Training – Carter Lebares, MD

Mental Skills Training for Surgeons- Applied Practice – Nicholas Anton, MS

At the conclusion of this session, participants will be able to:

- Identify the effects of psychological barriers on surgeons' performance and wellbeing.
- Recognize the potential applications of mental skills for surgeons to maintain optimal performance during acutely challenging clinical situations, and enhance their wellbeing and executive function.
- Practice several mental skills such as energy and attention management strategies, and mindfulness-based techniques in this interactive session.
